Undine Park Pavilion

Laramie, Wyoming
Public Meeting #2
4 May 2015

- ‘What We Heard’
- Plan & Connections
- 3d Views
- Pavilion Form Elevations & Railings
- Pavilion Form Vote & Discussion
- Materials Discussion
  - Flooring
  - Columns & Base
  - Roof

- Bigger is better
- ‘Honor the Past’ - design of structure, commemorative plaque
- Flexible design - shading in the evening, incorporated seating and storage
- Craftsman style construction with wood and stone base
- The public likes the idea of using materials that are common in Laramie.
- Design for community safety - railing design is code compliant
- Lighting is desired, maybe ambient lighting, string or tivoli lighting
- Design must take into account vandalism - graffiti, carving, etc.
- Durable materials - asphalt shingles, metal columns
- Hide the ADA ramp as much as possible.
- Small landscape areas around structure
- Consider vehicle access for easy drop off of materials at pavilion
- No more restrooms are desired
